Ronald Sanders, Director of AIDS Program
Los Angeles County Health Department
313 North Figuero Street
Room #212
Los Angeles, California 90012

Dear Ron:

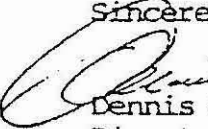

Enclosed are the donor demographics of the Cedars-Sinai blood donors involved in the suspected case of post transfusion AIDS in a [REDACTED] male [REDACTED]. This is the child that is currently being treated at UCLA Medical Center.

The patient and [REDACTED] were born at Cedars-Sinai Medical Center in [REDACTED] and were treated in the neonatal intensive care unit where they both received numerous transfusions.

We have listed the donors as males not donating since 1983, males continuing to donate, female donors and common donors to both [REDACTED] and [REDACTED]. There is, in addition, a common donor [REDACTED] with the [REDACTED] and another of our suspected cases of post transfusion AIDS patient name [REDACTED].

Hopefully, this information will aid in the investigation of these suspect donors, and if I can be of further assistance, please don't hesitate to call me.

Sincerely,

Dennis Goldfinger, M.D.
Director of Blood Bank
